

Pneumatic small-cartridge adapter

DELO-XPRESS C30

Small size, wide compatibility.

Most commercially available cartridge adapters barely meet the handling and performance standards of most applications. To refine your production process, we as an adhesive systems provider decided to make things easier by developing our own pneumatic small cartridge adapter.

DELO-XPRESS C30 impresses with **easy handling** (see p. 2), a **compact design** and a durable, reliable seal. It **prevents leaks** and abraded rubber particles in the adhesive.

In addition, the DELO adapter scores with its universality: It is not only suitable for **30 cc** cartridges, but also **55 cc and 70 cc cartridges**. Thanks to its special closing mechanism, it can also **compensate for large cartridge tolerances**, and is therefore suitable for cartridges from all popular manufacturers.

Easy handling

The adapter is as easy to fit as it is intuitive. All you have to do is place it on the cartridge, turn it 90° and lock it with the quick-release fastener.

Instead of demanding press-fitting or screwing it in tediously, the sealing ring is clamped in a smooth, eccentric motion once the adapter has been inserted.

**Attach the adapter
to the cartridge**

Turn 90°

**Lock with the quick-
release fastener**

**Fully assembled
adapter**

Technical data

	DELO-XPRESS C30
Dimensions	54 × 28 × 27 mm
Weight	~ 22 g
Max. operating pressure	7 bar
Material	Glass fiber reinforced PP and PA6
Suitable for	30 cc, 55 cc and 70 cc small cartridges from all common manufacturers

Questions?
equipment-experts@delo.de

Observe the permissible temperature and pressure limits of the cartridge adapter and the cartridge used. Observe the safety instructions for the medium to be dispensed. Always wear safety goggles and protective gloves during work. Always dispose of the parts in accordance with local regulations. Only open and close the compressed air adapter when it is depressurized.
